Glass Splashbacks

Suburban Glass & LEADLIGHTS

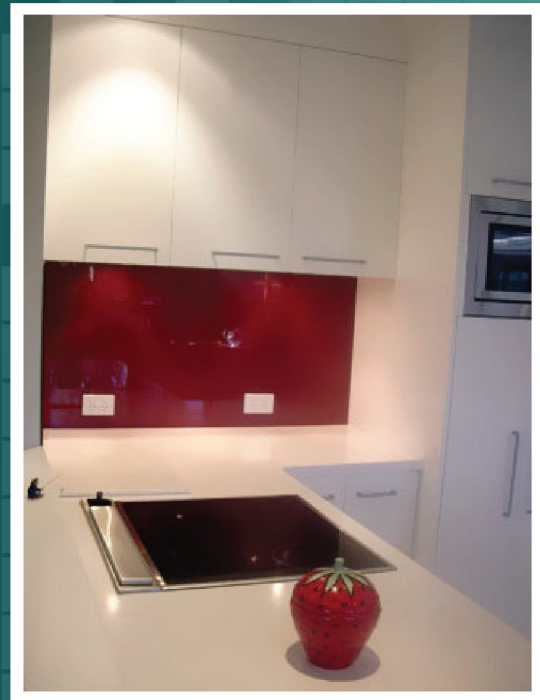

Glass splashbacks present a stylish, contemporary look for kitchens and bathrooms and are extremely popular with architects and interior designers. Glass splashbacks are painted toughened glass panels that are not only waterproof and heat resistant, but also very low maintenance. There will be no more grout lines to scrub or whiten!

Glass splashbacks and shower walls can be made in either clear or slump (textured) glass and can be painted in any colour from a master paint palette. Even spectacular metallic finishes are easily achieved.

Our splashbacks are made using 6mm starphire toughened safety glass. Starphire or 'low iron' glass is a pure clear glass which will show no distortion to your colour choice, unlike clear float glass which will distort some colours.

Suburban Glass & Leadlights will custom fit to meet your requirements, accommodating any electrical fittings, cut-outs, range hoods and cupboards. With its superb strength and cleaning properties, combined with an unlimited choice of colours, you will be hard-pressed to find a more versatile look for your kitchen or bathroom.
